Discharge Summary

Unsigned

DIS

Report Status :

Unsigned

ADMISSION DATE :

7-3-95

DISCHARGE DATE :

7-3-95

HISTORY OF PRESENT ILLNESS :

The patient is an 82 year old male who came to the emergency room with an incarcerated right inguinal hernia .

The patient has a history of previous appendectomy with an incision that went down into this same area .

The hernia could not be reduced in the emergency room .

The patient was admitted to the hospital therefore .

PHYSICAL EXAMINATION :

On physical examination , there was a tender mass in the right groin .

The physical examination was otherwise noncontributory .

LABORATORY DATA :

Noncontributory .

HOSPITAL COURSE :

On the morning after the patient 's admission , an operation was carried out under local anesthetic .

The patient was found to have recurrence at the internal ring from previous inguinal herniorrhaphy .

The operation was carried out under local anesthetic , which the patient tolerated well .

The patient was discharged home in stable condition later on the same day .
