RENAL CELL CARCINOMA .

Unsigned

DIS

Report Status :

Unsigned

ADMISSION DATE :

5/23/95

DISCHARGE DATE :

5/30/95

PRINCIPAL DIAGNOSIS :

Renal cell carcinoma .

ASSOCIATED DIAGNOSIS :

Hypertension .

PRINCIPAL PROCEDURE :

Right radical nephrectomy on 5/23/95 .

MEDICATIONS ON DISCHARGE :

Percocet .

HISTORY OF PRESENT ILLNESS :

This 60 year old female presents with a mass in her right kidney and she was admitted a Same Day admit for right radical nephrectomy .

This was carried out uneventfully , and pathology revealed a renal cell carcinoma .

Postoperatively , she had a rather prolonged episode of ileus .

She also had some respiratory problems requiring formal chest physical therapy and otherwise did quite well .

Her postoperative creatinine was 0.8 .

Electrolytes were 135 , 4.5 , chloride 101 , CO2 31 , hematocrit 34.8 .

Preoperative evaluation revealed bone scan with no evidence of metastatic disease .

Electrocardiogram showed sinus bradycardia .

She will be follow up as an outpatient after her discharge .
