DIS

Admission Date :

01/11/1996

Report Status :

Signed

Discharge Date :

01/19/1996

IDENTIFICATION :

Ms. Less was initially admitted to the Vascular Surgery Service for Dr. Scosthua ng and was recently transferred to the Neurosurgery Service under the care of Dr . Pae .

HISTORY OF PRESENT ILLNESS :

Ms. Less is a 79 year old white female with history of non small cell lung cance r diagnosed in 02/95 .

She underwent a resection for stage I in 10/95 and treated with XRT .

She presented to the hospital with a numb right leg this morning and underwent a n emergent embolectomy .

PAST MEDICAL HISTORY :

Coronary artery disease status post myocardial infarction in 1990 , peptic ulcer disease and hypertension .

MEDICATIONS :

Medications on admission were Coumadin , Digoxin Synthroid , Lopressor and Zanta c .

On 1/14/96 , she had a dialysis catheter .

On 1/18/96 , she had an acute change in mental status and underwent an emergent head CT scan which showed a massive subarachnoid hemorrhage with bleeding in the subarachnoid space , and throughout the ventricles .

She also had significant hydrocephalus .

Follow up CT scan showed worsening of her hydrocephalus and she had a ventriculo stomy placed in the Intensive Care Unit .

She failed to improve following placement of the ventriculostomy and her poor pr ognosis was discussed with the family .

The family at that point considering the multiple system involvement of her dise ases , decided to make the patient DNR and withdraw care .

The patient expired on 1/19/96 at 11:35 p.m.

The medical examiner was called and the case was discussed , and he declined aut opsy of the case .

The family was informed and all questions were answered .
